Getting Network Login information for Students

Be aware that all student passwords for all learning programs include a lowercase letter “a” at the end. To retrieve a list of all your students’ network log information, teachers should log into Aeries.net where you will login with your District credentials.

Once in Aeries.net Click on View All Report > Custom Reports. Then click on Student Network ID.

This will open a new browser window which you can printout. If you don’t see your Report look toward the bottom of the toolbar and click on the drop-down arrow and click on open.
